Open proxy settings

3.

The image shows a Windows Settings window with the 'Proxy' section selected. The left sidebar lists various settings categories, with 'Network & Internet' expanded. The main pane shows the 'Automatic proxy setup' section, where the 'Use setup script' toggle is turned on and the script address is entered as 'http://www.lib.unideb.hu/config.proxy'. A 'Save' button is visible below the address field. A dark green overlay at the bottom contains a checklist of steps: 'Use setup script >>' (checked) and 'Script address: http://www.lib.unideb.hu/config.proxy >> Save'. To the right, a portion of the 'Advanced settings' pane is visible, showing 'Open sites in apps' and 'Downloads' sections. A yellow circle with the number '4.' is in the bottom right corner.
