

Symposia Biologica Hungarica

Vol. 25

Redigit

P. ELŐDI

AKADÉMIAI KIADÓ, BUDAPEST 1984

CONTENTS

Introductory remarks

GENERAL ASPECTS

- ANTONOV, V.K.
General Problems of Proteolytic mechanisms 3
- POLGÁR, L., ASBÓTH, B.
Stabilization of the tetrahedral intermediate
in the catalysis by serine and cysteine
proteinases 17
- KOVACH, I.M., SCHOWEN, R.L.
Substrate and solvent isotope effects and
"proton inventories" for the elucidation of
catalytic strategies of serine proteases 29
- STEPANOV, V.M.
Proteinases as tools in peptide synthesis.
Synthesis of substrates for proteinase assay 49
- CHRISTENSEN, U., IPSEN, H.-H.
Regulation of fibrinolysis 57
- PATTHY, L., TREXLER, M., VÁLI, Zs., BÁNYAI, L.,
VÁRADI, A.
Kringle structures of human plasminogen: Their
role in the regulation of fibrinolysis 73
- ELÓDI, P., KISS, I., Cs.-SZABÓ, G., POZSGAY, M.
Substrate design and proteolytic action 81

PROTEINASES AND REGULATION

- BOHLEY, P., KIRSCHKE, H., SCHAPER, S.,
WIEDERANDERS, B.
Principles of the regulation of intracellular
proteolysis 101
