EXCERPTA MEDICA, AMSTERDAM - NEW YORK - OXFORD

CONTENTS

Section I:

CELLULAR AND IONIC MECHANISMS IN CEREBROVASCULAR SMOOTH MUSCLE AND ENDOTHELIUM

Vascular smooth muscle and endothelial cells: Pharmacology and interactions <i>J.C. Stoclet</i>	3
Neurotransmitters and brain microvessels: Biochemical and pharmacological relations <i>S.I. Harik</i>	21
Ionic channels and control of cerebrovascular diameter. A review of cerebrovascular electrophysiology <i>G.D. Silverberg</i>	33
Electrophysiological responses of cerebral arterial muscle to environmental stimuli <i>D.R. Harder</i>	51
Sympathetic influences on cerebrovascular tone <i>J.A. Bevan and D. van Riper</i>	65
Hypoxic cerebral vasodilatation: An integration of direct and indirect vascular effects of hypoxia <i>W.J. Pearce</i>	87
In vivo assessments of the role of hemoglobin in cerebral oxygen delivery <i>D.F. Hanley, D.A. Wilson, M. Ferrari, K. Cross, J.F. Hartmann and R.J. Traystman</i>	103

Section II:

MONOAMINERGIC, CHOLINERGIC AND PEPTIDERGIC INNERVATION AND THE PHARMACOLOGY OF CEREBRAL VESSELS

Sympathetic activity in the cerebral vessels <i>E. Alborch and S. Lluch</i>	117
Recent studies on serotonin-containing fibers in cerebral circulation <i>T.J.-F. Lee</i>	133
Cholinergic innervation of pial and intracerebral blood vessels: Evidence, possible origins and sites of action <i>E. Hamel and C. Estrada</i>	151
Cholinergic innervation of cerebral blood vessels: Functional aspects <i>E. Pinard</i>	175

Segmental pharmacology within the cerebrovascular tree <i>J.E. Hardebo</i>	193
Origin of cerebrovascular peptide-containing nerve fibers <i>T. Itakura and H. Imai</i>	211
Dilatatory neuropeptides in the cerebral circulation <i>L. Edvinsson</i>	229
Action and interaction of vasoconstrictor peptides and amines in the brain circulation <i>C. Owman</i>	243

**Section III:
NON-VASOMOTOR ACTIONS OF CEREBROVASCULAR
INNERVATION**

Denervation related morphological alterations in cerebral vessels during hypertension <i>B.B. Johansson and C. Nordborg</i>	267
Trophic role of sympathetic nerves during hypertension <i>G.L. Baumbach and D.D. Heistad</i>	279
Mast cells in the cerebral circulation. Characterization and possible function <i>P. Aubineau and V. Dimitriadou</i>	293
Trigeminovascular system: Form and function in the cephalic vasculature <i>M.A. Moskowitz</i>	311

**Section IV:
RELATIONSHIP BETWEEN FLOW AND METABOLISM IN THE
BRAIN**

Coupling of blood flow and metabolism in the brain. The classical view <i>W. Kuschinsky</i>	331
Functional organization of central cerebrovascular pathways with special reference to the thalamus <i>S. Mraovitch</i>	343
Central neurogenic regulation of cerebral blood flow <i>D.J. Reis and C. Iadecola</i>	369

**Section V:
POSSIBLE ROLES OF NEUROTRANSMITTERS AND
NEUROMODULATORS IN ISCHEMIA**

Mechanisms of glutamate neurotoxicity in cerebral ischemia <i>T. Wieloch and E. Westerberg</i>	393
---	-----

NMDA receptors: Importance to cerebrovascular pharmacology and pathophysiology	
<i>J. McCulloch, C.K. Park, D.G. Nehls, E. Ozyurt, G.M. Teasdale and D.I. Graham</i>	411
Distant excitotoxic lesions	
<i>A. Tamura, T. Kirino and K. Sano</i>	425
Excitatory amino acids, adenosine and neuronal calcium homeostasis. An overview	
<i>J. Kriegelstein</i>	441 ✓
Potential protective activity of adenosine in cerebral ischemia	
<i>R.G. Boulou and M. Plotkine</i>	455
Non-glutamatergic neurotransmission: Role in ischemic brain injury	
<i>M.Y.-T. Globus and M.D. Ginsberg</i>	467
Ischemia-induced death in the vulnerable brain cells and the intracellular signal transducing system	
<i>K. Kogure</i>	481
Index of authors	487
Subject index	489
