NEUE BERICHTIGTE AUSGABE

BERLIN,

VERLAG VON DIETRICH REIMER (ERNST VOHSEN A.-G.).

Das nachstehende Verzeichnis enthält die sämtlichen alten geographischen Namen, unter Beifügung der Qualität und, wo es erforderlich schien, der nichtklassischen und heutigen Namen und mit Angabe der betreffenden Kartenummer und der durch Buchstaben am Kartenrande bezeichneten Felder des Gradnetzes, worin sie auf der Karte zu finden sind. Die Verweisung beschränkt sich für Namen, welche sich auf mehreren Karten wiederholen, auf diejenige Karte, welche bei größerem Maßstabe die meisten Details enthält, indem dadurch die Auffindung auf den anderen Karten von selbst gegeben ist. Die im engsten Sinne topographischen Details, welche den Inhalt der auf Tafel IX entstandenen Stadtpläne von Rom bilden, sind wegen ihrer Verschiedenartigkeit von dem geographischen Inhalte der übrigen Karten in einem besonderen, am Schlusse beigefügten Index zu dieser Tafel zusammengestellt worden.

An dieser Stelle ist nur über diejenigen sachlichen Anordnungen, welche sich nicht von selbst verstehen, Rechenschaft zu geben.

Die in der griechischen und römischen Literatur vorkommenden Namen sind in gewöhnlicher Schrift gesetzt, die aus anderen als griechischen oder römischen alten Quellen aufgenommenen Namen (sanskritische, baktrische, altpersische, armenische, assyrische, syrische, hebräisch-phönikische, ägyptische, etruskische) sind durch **Lapidarschrift** unterschieden.

Die abgekürzten Bezeichnungen der topographischen Qualität sind die allgemein verständlichen und in lateinischer Sprache gegeben aus Rücksicht auf die lateinische Abfassung der Nomenklatur der Karten und auf das nichtdeutsche Publikum. Unbezeichnet gelassen sind in der Regel bewohnte Ortschaften, außer wo wegen der Gleichnamigkeit mit Inseln, Bergen, Flüssen die ausdrückliche Bezeichnung als Ortschaft nötig schien, oder wo die historische Zugehörigkeit zu einer von der landchaftlichen Bezeichnung verschiedenen Nation bemerklich zu machen war (z. B. op. gr. = oppidum graecum). Geographische Synonyma sind entweder in Parenthese beigefügt oder durch s. (sive) verbunden; v. bedeutet nicht vel, sondern stets vide in Verweisungen auf andere Artikel.

In den zur Bezeichnung der Lage hinzugefügten Abkürzungen der Landesnamen ist den Gesamtnamen

größerer Gebiete, wie Ariana, Graecia, Italia, Gallia u. a. der Name der speziellen Landschaft (in Parenthese) beigefügt; dagegen bedeuten zwei oder drei ohne Parenthese nebeneinander stehende Landesnamen Zugehörigkeit der betreffenden Örtlichkeit zu beiden resp. mehreren, was sich bei Gebirgen und größeren Flüssen von selbst erklärt, bei Ortschaften durch schwankende Angaben der antiken Autoritäten, sowie durch historische Veränderungen der Grenzen bedingt wird. So bezeichnet z. B. Gall. Germ. einen Ort als auf der unentschiedenen Grenze beider großen Länder gelegen oder zu verschiedenen Zeiten dem einen oder dem anderen derselben angehörig, dagegen (Gall. Germ.) in demjenigen Teile der großen römischen Provinz Gallia gelegen, der seit Augustus den Spezialnamen Germania (cisrhenana) führte. Unmittelbar hinter dem Hauptnamen bezeichnet i. diesen als einer Insel angehörig, i, in Parenthese (insulae, Gen.) die Lage des betreffenden Ortes auf der Insel, deren Name folgt.

Alle auf die heutigen (oder überhaupt nachklassischen) Zustände bezüglichen Angaben sind in *Cursivschrift* gesetzt; von topographischen Bezeichnungen ist darin nur für jetzt nicht mehr bewohnte, in Ruinen liegende Ortschaften die Abkürzung *rud.* (rudera) gebraucht worden, und da solche Ruinen häufig nur mittelbar durch benachbarte Orte namentlich zu bezeichnen sind, findet sich öfters dabei die Abkürzung *j.* (juxta) oder *pr.* (prope). Die häufig vorkommenden rein appellativen Benennungen solcher Reste der alten Orte in den heutigen Landessprachen ohne unterscheidenden Beinamen (z. B. ital. *Cività*, *Castelvecchio*, neugriech. *Palaeókastron*, türk. *Eski Kalé*, *Ören-* oder *Viránschehr*, arab. *Khírbe*, *Kharaba* u. ähnl.) sind als unerheblich weggelassen worden. Um von denjenigen lebenden Namen, welche durch vollständige oder wenig veränderte Bedeutung der entsprechenden alten Namen ein historisches Interesse gewähren, diejenigen zu unterscheiden, welche aus gelehrter Kenntnis mit dem bei Neugriechen, Italienern, Spaniern in unserer Zeit auflebenden, patriotischen Interesse am Altertum erst wieder neu eingeführt wurden, sind letztere in eckige Klammern [—] eingeschlossen.

Die modernen Namen folgen einer landesüblichen Orthographie natürlich nur, soweit sie Sprachen angehören, welche sich unseres Alphabetes bedienen (also

den romanischen, der deutschen, polnischen, kroatischen und magyarischen); bei der Transkription aller übrigen Namen, — also namentlich der griechischen, albanesischen, serbisch-bulgarischen, türkischen, armenischen, persischen, indischen, arabischen — sowie der aus orientalischen Sprachen überlieferten antiken Namen, mußte mit Rücksicht auf die nichtdeutschen Leser eine allgemein verständliche Schreibart angewendet und mußten namentlich die im Deutschen für ganz andere Laute als im Englischen und Französischen gebrauchten Konsonanten *ch* und *j* vermieden und durch *kh* und *y* ersetzt werden. Ebenso ist der konsequente Gebrauch von *s* für den scharfen (im Deutschen durch *ß*, *fs* ausgedrückten), von *z* für den weichen (deutsch zu Anfang der Silbe durch einfaches *j* bezeichneten) Zischlaut eine Akkommodation an die englisch-französische (gleichmäßig auch holländische und westslawische) Orthographie, deren Angewöhnung der deutsche Leser schon wegen der jetzt allgemeinen Anwendung derselben in sprachwissenschaftlichen Werken zweckmäßig finden wird. Dagegen konnte *sch*, welches dem fremden Leser keine Schwierigkeit macht, sogar von französischen Linguisten häufig angewendet wird, ebenso unbedenklich beibehalten werden, wie die zusammengesetzte Lautbezeichnung *tseh* (für franz. *ch* oder engl. *ch*); der entsprechende weichere Laut (im Deutschen meist mit *dseh* umschrieben) ist jedoch nach französischer Schreibart durch *dj* (= engl. *j*) ausgedrückt.

Eine Ausnahme von der systematischen, die wirkliche Aussprache wiedergebenden Transkription bilden nur die alttestamentlichen Namen (besonders in Taf. III), für welche die Beibehaltung der durch die gebräuchlichen Übersetzungen gewohnheitsmäßig gewordenen, teilweise stärker von der Aussprache des Hebräischen

abweichenden Formen durch die Rücksicht auf die Schule, und zwar zunächst die deutsche Schule, geboten war. In dieser unphilologischen Umschreibung leidet namentlich die feinere Unterscheidung der semitischen Sibilanten, da für *š*, *ś*, *š*, *ś*, statt des *z*, *s*, *sch*, unserer Transkription in der lutherischen Übersetzung einformig nur *s*, dagegen für *š* (*ç* oder schärferes *s*) irrationell *z* (im Sinne der deutschen Aussprache = *ts*) gebraucht ist, so daß die Buchstaben *z* und *s* in der vulgärdeutschen und der antiken (griechisch-römischen) Schreibweise der palästinensischen Namen gerade den umgekehrten Wert haben, was bei der Vergleichung der verschiedenen Namensforschung zu beachten ist. Da der am meisten von dem traditionell gebrauchten *s* abweichende Laut des *sch* (*š*) in manchen Übersetzungen z. B. in der englisch-kirchlichen durch (*sh*) unterschieden wird, erschien es zweckmäßig, ihn in Karten und Text wenigstens durch einen Akzent über dem *s* in den mit Lapidarschrift gesetzten hebräischen Namen zu bezeichnen, während in den Namen aus anderen Sprachen das volle *sch* beibehalten ist.

Die Vokale haben durchaus den der reinen deutschen (oder italienischen) Aussprache entsprechenden Wert; ihre Quantität ist nur in den Fällen einer möglichen Unsicherheit ausdrücklich bezeichnet: daß dies in den verschiedenen Schriftarten durch verschiedene Zeichen (z. B. *ā* und *â*) bewirkt ist, hat seinen Grund nur in typographischer Konvenienz. Ein von der Quantität unabhängiger Wortakzent ist in einzelnen modernen Namen gesetzt worden, die man häufig oder gewöhnlich mit unrichtiger Akzentuierung ausgesprochen hört.

Wir lassen noch zur Hilfe für weniger geübte Leser die größtenteils selbstverständliche Erklärung der abgekürzten Ländernamen in alphabetischer Reihe folgen.
