# **LABORATORY MANUAL FOR GENERAL, ORGANIC AND BIOORGANIC CHEMISTRY**

## **II. WORKBOOK**

Written by

**Éva Bakó, Viktor Dombrádi, Ilona Farkas, Andrea Murányi, Balázs Szöőr,  
Kornélia Szűcs, Béla Tóth, Emese Vissi**

Edited by

**Viktor Dombrádi**

Debrecen, 1996

## Contents

Laboratory techniques	1
Chemical analysis of a water sample	3
Analysis of inorganic salts and complexes	4
Properties of buffers and indicators	6
Chemical reactions of organic compounds	7
Analysis of mono- and disaccharides	12
Reactions of amino acids and proteins	13
Precipitation of proteins	15
Strong acid-strong base titrations	16
Weak acid-strong base titrations	20
Determination of the alkalinity of water	24
Determination of the acid value of fats and oils	25
Titration with potassium permanganate	26
Iodometric titrations	30
Titration with potassium bromate	33
Complexometric titrations	37
Precipitation titrations	40
Photometric determination of inorganic phosphate according to Taussky and Shorr	42
Determination of acid labile phosphate in organic compounds	44
Photometric determination of iron	46
Quantitative protein analysis	49
Assay of glucose	51
Assay of glycogen	53
Polarimetric analysis of carbohydrates	54
Electrometric pH measurement	56
Potentiometric titration	57
Electrometric determination of Na <sup>+</sup> concentration	61
Conductometric investigation of the electrolytes	62
Conductometric titrations	63

Paper chromatography	65
Thin-layer chromatography	69
Ion-exchange chromatography	73
Gel chromatography	76
Dialysis	80
Agarose gel electrophoresis of DNA	81
SDS-polyacrylamide gel electrophoresis of proteins	84
Kinetic study of the saponification reaction of ethylacetate	86
Kinetic analysis of the oxidation of iodide ion using the Landolt-method	88
Kinetic analysis of the inversion of sucrose	90
Assay of $\alpha$ -amylase activity with starch substrate	92
Assay of glycogen phosphorylase activity	94
