

**ECOLOGY
OF AN OAK FOREST
IN HUNGARY**

RESULTS OF "SÍKFŐKÚT PROJECT" 1

STRUCTURE, PRIMARY PRODUCTION
AND MINERAL CYCLING

edited by

P. JAKUCS

Corresponding Member of the
Hungarian Academy of Sciences

AKADÉMIAI KIADÓ, BUDAPEST 1985

CONTENTS

| | | |
|-----------------------------------|----------------------------------------------------------------------------|----|
| LIST OF CONTRIBUTORS | V | |
| FOREWORD | XI | |
| INTRODUCTION | XIII | |
| Chapter I | AIMS AND PREPARATION OF RESEARCH | |
| | (P. JAKUCS) | 1 |
| | I.1 Goals of research, studied topics | 3 |
| | I.2 Organization of complex research | 6 |
| | I.3 Selection of the sample site | 7 |
| | I.4 Establishment of the sample area | 10 |
| Chapter II | LANDSCAPE DESCRIPTION OF THE BÜKKALJA | 13 |
| | II.1 Geomorphology, geological structure (A. HEVESI) | 15 |
| | II.2 Soils of Bükkalja (S. PAPP) | 16 |
| | II.3 Climate of Bükkalja (L. NAGY) | 19 |
| | II.4 State -of-the-art of the cultivation of Bükkalja (P. JAKUCS) | 32 |

| | | |
|--------------------|-----------------------------------------------------------------------------------------------|------------|
| Chapter III | CHARACTERIZATION OF THE SAMPLE AREA . . . | 37 |
| III.1 | Phytosociology of the forest (M. PAPP–P. JAKUCS) | 39 |
| III.2 | Soil conditions of the forest (P. STEFANOVITS) | 50 |
| III.3 | Weather conditions in the sample area during the research period (L. NAGY) | 58 |
| | | |
| Chapter IV | STRUCTURE OF THE FOREST | 105 |
| IV.1 | Introduction (P. JAKUCS) | 107 |
| IV.2 | Higher plants (P. JAKUCS) | 108 |
| IV.3 | Phenology (L. JUHÁSZ–P. JAKUCS) | 127 |
| IV.4 | Epiphytic mosses (T. SIMON) | 138 |
| IV.5 | Soil algae and their diversity (Zs. P. KOMÁROMY) | 139 |
| | | |
| Chapter V | PHYTOMASS AND PRIMARY ORGANIC MATTER PRODUCTION | 149 |
| V.1 | Phytomass and production of trees (B. L. PAPP) . | 151 |
| V.2 | Phytomass and production of shrubs (I. KÁRÁSZ) | 169 |
| V.3 | Phytomass and production of herbs (M. PAPP) .. | 180 |
| V.4 | Phytomass and production of epiphytic mosses (T. SIMON) | 208 |
| V.5 | Litter production of the forest (J. A. TÓTH–B. L. PAPP–P. JAKUCS) | 211 |
| V.6 | Total phytomass and primary organic matter production of the forest (P. JAKUCS) | 227 |
| | | |
| Chapter VI | GROWTH AND PIGMENT INVESTIGATIONS | 229 |
| VI.1 | Leaf growth investigations on trees (K. VIRÁGH–I. PRÉCSÉNYI) | 231 |
| VI.2 | Leaf growth investigations of shrubs (I. B. KÁLÓCZY–I. PRÉCSÉNYI) | 260 |
| VI.3 | Pigment distribution in the leaves of individuals and in the community (Z. TUBA) | 272 |

| | | |
|-------------------------|------------------------------------------------------------------------------------------------------------|-----|
| Chapter VII | ENERGY CONTENT OF AUTOTROPHIC PARTS OF THE FOREST (B. L. PAPP) | 287 |
| | VII.1 Introduction | 289 |
| | VII.2 Investigation method | 289 |
| | VII.3 Energy values of dominant autotrophs and their components' | 291 |
| | VII.4 Energy content of the autotrophic level of the forest | 306 |
| | VII.5 Energy flow through the forest plants and ecological efficiency | 314 |
| | VII.6 Summary | 316 |
| | | |
| Chapter VIII | NUTRIENT CONTENT OF THE AUTOTROPHIC LEVEL | 319 |
| | VIII.1 Nutrient content of woody plants (B. L. PAPP) .. | 321 |
| | VIII.2 Nutrient content of herbs (L. I. MÉSZÁROS) | 348 |
| | VIII.3 Nutrient content of dominant epiphytic moss (<i>Hypnum cupressiforme</i>) (L. DÉZSI-T. SIMON) ... | 374 |
| | | |
| Chapter IX | ELEMENT MIGRATION AND LITTER DECOMPOSITION | 383 |
| | IX.1 Amount and element content of precipitation reaching the forest soil (M. SZABÓ) | 385 |
| | IX.2 Leaf litter decomposition and elements released in the course of decomposition (J. A. TÓTH) | 452 |
| | IX.3 Dynamics of elements in the soil (M. KOVÁCS) .. | 497 |
| | IX.4 Summarizing the trends of element-movement in the forest (P. JAKUCS) | 511 |
| | | |
