

# ABSTRACTS

## TENTH INTERNATIONAL SYMPOSIUM ON CATIONIC POLYMERIZATIONS AND RELATED IONIC PROCESSES

August 26-29, 1991  
BALATONFÜRED, HUNGARY

# Contents

## L. Invited Lectures

- L01** *Albertsson A.-C. and Palmgren R.:* Mechanism and kinetics in the ring-opening polymerization of 1,5-dioxepan-2-one (DXO) / **9**
- L02** *Bywater S.:* Active centre structure and the stereoregulation process in anionic polymerization / **10**
- L03** *Franta E., Kubisa P., Kada S. O. and Reibel L.:* Synthesis of functionalized poly(1,3-dioxolane) / **11**
- L04** *Gandini A.:* Furan chemistry and ionic polymerization: a novel approach to original structures / **12**
- L05** *Hogen-Esch T. E.:* Recent developments in the stereochemistry of anionic polymerization of polar vinyl monomers / **13**
- L06** *Jedlinski Z.:* Novel ring—opening polymerization induced by alkali metal anions / **14**
- L07** *Kazanskii K. S.:* Functionalization during anionic polymerization of heterocycles / **15**
- L08** *Kennedy J. P.:* Tailored macromolecules by living carbocationic techniques / **16**
- L09** *Kricheldorf H. R., Jenssen J. and Weegen-Schulz B.:* Cationic polymerization of cyclocarbonates / **17**
- L10** *Kubisa P. and Biela T.:* Reactive oligomers by addition of oxiranes to phosphoric acid. Kinetics and stereochemistry / **18**

- L11** *Lenz R. W.*: The coordination polymerization of  $\beta$ -substituted- $\beta$ -propiolactones / 19
- L12** *Toman L. and Lukáš R.*: Effect of the mixture t-BuCl/SnCl<sub>4</sub> on the cationic polymerization of isobutylene / 20
- L13** *Matyjaszewski K.*: Carbenium ions, onium ions and covalent species in the cationic polymerization of alkenes / 21
- L14** *Müller A. H. E.*: The role of association/complexation equilibria in the anionic polymerization of (meth)acrylates / 22
- L15** *Nuyken O., Maier G., Leitner M. B. and Yang D.*: Polymers with indane units by cationic polymerization / 23
- L16** *Penczek S.*: The carbenium-oxonium equilibria in cationic polymerizations / 24
- L17** *Pepper D. C.*: Kinetics and mechanisms of the ionic polymerizations of alkyl cyanoacrylates / 25-26
- L18** *Plesch P. H.*: Cationoid living polymerizations / 27
- L19** *Puffr R., Stehlíček J. and Sebenda J.*: The role of N-acyllactam in ionic lactam polymerization / 28
- L20** *Rempp P.*: Synthesis of model macromolecules via ionic polymerization / 29-30
- L21** *Rozenberg B. A.*: Cationic polymerization of  $\epsilon$ -caprolactone in the presence of diols via the activated monomer mechanism / 31
- L22** *Sawamoto M. and Higashimura T.*: Living cationic polymerization of vinyl ethers and styrene derivatives: design of initiating systems and controlled polymer synthesis / 32
- L23** *Ignatious F., Delaviz Y., Cabasso I. and Smid J.*: Anionic polymerization of styryl bismuth monomers / 33
- L24** *Tsvetanov C. B., Dimov D. K. and Petrova E. B.*: Solvating agents in anionic polymerization / 34

- L25** *Vairon J.-P.*: Stability of carbocationic species in the polymerization of styrene and homologues / 35
- L26** *Vogl O.* and *Hatada K.*: Structure, stereochemistry and conformation of oligomers in stereospecific ionic polymerization / 36
- L27** *Webster O. W.*: A comparison of group transfer and anionic polymerization of acrylic monomers / 37
- L28** *Yagci Y.*: New aspects on the photoinitiated free radical-promoted cationic polymerization / 38

### C. Short Communications

- C01** *Cheradame H.*, *Habimana J.* and *Chen F. J.*: Polymers containing pseudohalide groups by cationic polymerization. 6. Azidotelechelic polyisobutylene by polymerization initiated by the systems Lewis acids-2-azido-2-phenylpropane / 41
- C02** *Habimana J.*, *Cheradame H.*, *Chen F. J.* and *Stanat J. E.*: Polymers containing pseudohalide groups by cationic polymerization 7. Azidotelechelic polyisobutylene by polymerization initiated by the system Lewis acids-2-azido-2,4,4-trimethylpentane / 42
- C03** *Völkel T.*, *Schappacher M.* and *Deffieux A.*: Nature of active species and reaction mechanism in the living cationic polymerization of vinyl ethers initiated by HX/Lewis acid systems / 43
- C04** *Duda A.*: Polymerization with reversible aggregation of the active species. The case of pseudoanionic polymerization of  $\epsilon$ -caprolactone / 44
- C05** *Dworak A.* and *Schulz R. C.*: Application of chloroformates to initiation of oxazoline polymerization / 45
- C06** *Gyor M.*, *Wang H.-C.* and *Faust R.*: Living carbocationic polymerization of isobutylene with blocked bifunctional initiators in the presence of proton trap / 46

- C07** *Iván B., Kennedy J. P. and Mackey P. W.:* Telechelic polyisobutylene-based amphiphilic networks: a new class of biomaterials / 47
- C08** *Kim Y. H.:* Alpha-halogenated carboxylic acids and their corresponding zinc salts in the living polymerization of isobutyl vinyl ether / 48
- C09** *Koshimura K., Price J. L. and Kennedy J. P.:* Synthesis, characterization and properties of a new thermoplastic elastomer: PMMA-PIB-PMMA / 49
- C10** *Priola A., Gozzelino G. and Audisio G.:* Effect of the initiator on the cationic oligomerization of isoprene / 50
- C11** *Puskas J. E., Kaszas G. and Litt M.:* Chain carriers in living isobutylene polymerizations / 51
- C12** *Thomas L., Polton A., Tardi M. and Sigwalt P.:* Transition from "conventional" to "apparently living" cationic systems in the polymerization of indene / 52
- C13** *Slomkowski S., Sosnowski S. and Penczek S.:* Kinetics of the anionic polymerization of lactones / 53
- C14** *Spange S. and Simon F.:* Cationic interfacial polymerization on silica surface / 54
- C15** *Tezuka Y. and Imai K.:* Synthesis and reactions of uniform size telechelic polymers via ionic processes / 55
- C16** *Laporte D. and Van Beylen M.:* Anionic polymerization of one-ended living polystyrene with calcium as a counterion in tetrahydrofuran / 56
- C17** *Velichkova R. S., Gancheva V. B. and Christova D. C.:* Macromonomers and telechelics via cationic polymerization of heterocycles / 57
- C18** *Vlček P. and Lochmann L.:* Anionic polymerization of 2-ethylhexylacrylate initiated by complex base lithium esterolate/lithium tert.butoxide / 58

**C19** *Walch E. and Gaymans R. J.:* Synthesis of anhydride telechelic polyisobutylene / 59

## **P. Posters**

**P01** *De Clerq R. R. and Goethals E. J.:* Polymer networks containing poly-(1,3-dioxolane) segments / 63

**P02** *Fehervari A. F.:* Polymerization behavior of isobutylene initiated by ester/Lewis acid complexes / 64

**P03** *Gomes A. S. and Soares B. G.:* Organic halides as initiators in cationic polymerization of styrene, alpha-methylstyrene and indene in sulfur dioxide / 65

**P04** *Ikker A., Baltus E. and Möller M.:* Coupling of monofunctional anions and bifunctional initiation of anionic polymerization / 66-67

**P05** *Nyander J., Sundell P.-E., Skolling O., Elman B., Nyström J.-E. and Jönsson S.:* Thermally and photochemically induced cationic polymerization of vinyl ethers using novel ringopening sulfonium salts / 68

**P06** *Kawakami Y.:* Liquid crystalline polyoxetane by cationic polymerization / 69

**P07** *Everland H., Nielsen A. and Kops J.:* Preparation of polymers with controlled structure by living cationic and group transfer polymerization / 70

**P08** *Kowalczyk M., Kurcok P. and Jedliński Z.:* New facts concerning the mechanism of anionic polymerization of lactones by potassium alkoxides / 71

**P09** *Kurcok P., Penczek J. and Jedliński Z.:* Anionic block polymerization of  $\delta$ -valerolactone and L-lactide / 72

**P10** *Kurjata J. and Chojnowski J.:* Kinetic features of the polymerization of fully methylated silicon analogue of dioxane / 73

- P11** *Loontjens T., Derks F. and Kleuskens E.:* Block copolymers of poly (vinyl ethers) and poly (ethylene glycol) by means of the living cationic polymerization of vinyl ethers / **74**
- P12** *Toman L., Lukáš R. and Speváček J.:* Effect of the mixture DDH/SnCl<sub>4</sub> on the cationic polymerization of isobutylene / **75**
- P13** *Marek M., Pecka J. and Halaska V.:* The cationic polymerization of olefins with Fe<sup>3+</sup> halides / **76**
- P14** *Masař B. and Vlček P.:* Block copolymers syntheses by group transfer polymerization / **77**
- P15** *Nguyen H. A. and Cheradame H.:* Kinetic study of UV-induced cationic polymerization of cyclohexane oxide initiated by triarylsulfonium hexafluorophosphate / **78**
- P16** *Rao B. and Wu M.:* Synthesis of styrene-ε-caprolactone di- and star block copolymers by living anionic copolymerization / **79**
- P17** *Roescher A., Höpken J. and Möller M.:* Synthesis of poly(vinyl ethers) with perfluoroalkyl pendant groups / **80**
- P18** *Sípos L., Zsuga M. and Kelen T.:* Living polymerization of L,L-lactide with potassium tert-butoxide and its 18-crown-6 complex / **81**
- P19** *Skolling O., Hilborn J. and Jönsson S.:* The influence on cationic polymerization of vinyl ethers in the presence of thioethers and thiols / **82**
- P20** *Duguet E. and Soum A.:* Cationic ring-opening polymerization of cyclosilazanes / **83**
- P21** *Szymanski R. and Penczek S.:* The ester-ion equilibria and relative reactivities in the polymerization of cyclic acetals / **84**
- P22** *Donescu D., Uncuta C. and Vuluga D. M.:* Initiation of cationic ring-opening polymerization of cyclic acetals / **85**
