ZWÖLF KARTEN ZUR ALTEN GESCHICHTE

VON

H. KIEPERT.

BERLIN

VERLAG VON DIETRICH REIMER

1877.

Das nachstehende Verzeichniss, welches einem wiederholt kundgegebenen Wunsche vieler Besitzer der früheren Auflagen des Atlases entsprechen soll, enthält die sämtlichen alten geographischen Namen, unter Beifügung der Qualität und, wo es erforderlich schien, der nichtclassischen und heutigen Namen und mit Angabe der betreffenden Karte in römischer Zahl und der durch Buchstaben am Kartenrande bezeichneten Felder des Gradnetzes, worin sie auf der Karte zu finden sind. Die Verweisung beschränkt sich für Objecte, welche sich auf mehreren Karten wiederholen, auf diejenige Karte, welche bei grösserem Maasstabe die meisten Details enthält, indem dadurch die Auffindung auf den anderen generellen Karten von selbst gegeben ist. Die im engsten Sinne topographischen Details, welche den Inhalt der auf Taf. IX enthaltenen Stadtpläne von Rom bilden, sind wegen ihrer Verschiedenartigkeit von dem geographischen Inhalte der übrigen Karten in einem besonderen, am Schlusse beigefügten Index zu dieser Tafel zusammengestellt worden. Es ist an dieser Stelle nur über diejenigen sachlichen Anordnungen, welche sich nicht von selbst verstehen, Rechenschaft zu geben.

Die in den beiden classischen Litteraturen (ausschliesslich des neuen Testaments) vorkommenden Namen sind in gewöhnlicher Schrift gesetzt, die aus anderen als griechischen und römischen Quellen aufgenommenen Namen (sanskritische, baktrische, altpersische, armenische, assyrische, syrische, hebräisch-phoenikische, aegyptische, etruskische, altgermanische) sind durch **Lapidarschrift** (sog. Egyptienne) unterschieden.

Die abgekürzten Bezeichnungen der topographischen Qualität sind die allgemein verständlichen, in lateinischer Sprache gegeben aus Rücksicht auf die lateinische Abfassung der Nomenclatur der Karten und auf das nichtdeutsche Publicum. Rg. bedeutet regio; unbezeichnet gelassen sind in der Regel be-

wohnte Ortschaften, ausser wo wegen der Gleichnamigkeit mit Inseln, Bergen, Flüssen die ausdrückliche Bezeichnung der Ortschaft (oppidum) nöthig schien, oder wo die historische Zugehörigkeit zu einer von der landschaftlichen Bezeichnung verschiedenen Nation bemerklich zu machen war, (op. gr. = oppidum graecum, op. ph. = oppidum phoenicium). Geographische Synonyma sind entweder in Parenthese beigesezt oder durch s. (sive) verbunden; v. bedeutet nicht vel, sondern stets vide in Verweisungen auf andere Artikel.

Auch die zur Bezeichnung der Lage hinzugefügten Abkürzungen der Landesnamen bedürfen keiner Erklärung; bei grösseren, unter Gesamtnamen zusammengefassten Gebieten, wie Ariana, Graecia, Italia, Gallia u. a. ist der Name der speciellen Landschaft (in Parenthese) beigefügt; dagegen bedeuten zwei oder drei ohne Parenthese nebeneinander stehende Landesnamen Zugehörigkeit der betreffenden Oertlichkeit zu beiden, resp. allen, was sich bei Gebirgen und grösseren Flüssen von selbst erklärt, bei Ortschaften durch schwankende Angaben der antiken Autoritäten selbst, sowie durch historische Veränderungen der Grenzen bedingt wird. So bezeichnet z. B. **Gall. Germ.** einen Ort: als auf der unentschiedenen Grenze beider grossen Länder gelegen oder zu verschiedenen Zeiten dem einen oder dem anderen derselben angehörig, dagegen **Gall. (Germ.)** in demjenigen Theile der grossen römischen Provinz Gallia gelegen, der seit Augustus den Specialnamen Germania (cisrhenana) oder seit Claudius G. superior und inferior führte; i. unmittelbar hinter dem Hauptnamen bezeichnet diesen als einer Insel angehörig, i. in Parenthese (insulae, Gen.) die Lage des betreffenden Ortes auf der Insel, deren Name folgt.

Alle auf die heutigen (oder überhaupt nachclassischen) Zustände bezüglichen Angaben sind in *Cursivschrift* gesetzt; von topographischen Bezeichnungen ist

darin nur für jetzt nicht mehr bewohnte, in Ruinen liegende Ortschaften die Abkürzung *rud.* (*rudera*) gebraucht worden; und da solche Ruinen häufig nur mittelbar durch benachbarte Orte namentlich zu bezeichnen sind, findet sich öfters dabei die Abkürzung *j.* (*juxta*) oder *pr.* (*prope*). Die häufig vorkommenden rein appellativen Benennungen solcher Reste der alten Orte aus den heutigen Landessprachen ohne unterscheidenden Beinamen (z. B. ital. *Cività, Castellovecchio*, neugriech. *Palaeokastron*, türk. *Ören-* od. *Viran-schehr*, arab. *Khirbe, Kharaba* u. ähnl.) sind als unerheblich weggelassen worden. Um von denjenigen lebenden Namen, welche durch Bewahrung oder geringe Veränderung der entsprechenden alten Namen ein historisches Interesse gewähren, diejenigen zu unterscheiden, welche aus gelehrter Kenntniss mit dem bei Neugriechen, Italienern, Spaniern in unserer Zeit auflebenden patriotischen Interesse am Altertum erst wieder neu eingeführt worden sind, und welche von Nichtkennern dieses Vorganges leicht als aus dem Altertum direct erhaltene misverstanden werden könnten, sind dieselben in eckige Klammern [] eingeschlossen.

Die modernen Namen folgen einer landesüblichen Orthographie natürlich nur, soweit sie Sprachen angehören, welche sich unseres Alphabets bedienen (also den romanischen und germanischen, der kroatischen und magyarischen); bei der Transcription aller übrigen Namen, — also namentlich der griechischen, albanesischen, serbisch-bulgarischen, türkischen, armenischen, persischen, indischen, arabischen, sowie der aus orientalischen Sprachen überlieferten antiken Namen — musste mit Rücksicht auf die nichtdeutschen Leser eine allgemein verständliche Schreibart angewendet und mussten namentlich die im Deutschen für ganz andere Laute als im Englischen und Französischen gebrauchten Consonanten *ch* und *j* vermieden und durch *kh* und *y* ersetzt werden. Ebenso ist der consequente Gebrauch von *s* für den scharfen (im Deutschen durch *ß, ş* ausgedrückten), von *z* für den weichen (deutsch zu Anfang der Sylbe durch einfaches *j* bezeichneten) Zischlaut eine Accommodation an die englisch-französische (gleichmässig auch holländische und westslavische) Orthographie, deren Angewöhnung der deutsche Leser schon wegen der jetzt allgemeinen Anwendung derselben in sprachwissenschaftlichen Werken zweckmässig finden wird. Dagegen konnte *sch*, welches dem fremden Leser keine Schwierigkeit macht, sogar

von französischen Linguisten häufig angewendet wird, ebenso unbedenklich beibehalten werden, wie die zusammengesetzte Lautbezeichnung *tsch* (für franz. *tch* oder engl. *ch*); der entsprechende weichere Laut ist nach französischer Schreibart durch *dj* (= engl. *j*) ausgedrückt; der dem Deutschen wie dem Englischen fehlende einfache Laut des französischen *j* (slav. *ž*) ist bei dem einzigen altpersischen Namen, in welchem er vorkommt, besonders erklärt.

Eine Ausnahme von der systematischen, die wirkliche Aussprache wiedergebenden Transcription bilden nur die alttestamentlichen Namen (besonders in Taf. III), für welche die Beibehaltung der durch die gebräuchlichen Uebersetzungen gewohnheitsmässig gewordenen, teilweise stärker von der Aussprache des Hebräischen abweichenden Formen durch die Rücksicht auf die Schule und zwar zunächst die deutsche Schule, geboten war. In dieser unphilologischen Umschreibung leidet namentlich die feine Unterscheidung der semitischen Sibilanten, da für *י, ד, ש, שׁ* statt des *z, s, sch* unserer Transcription in der lutherischen Uebersetzung einförmig nur *s*, dagegen für *צ* (*ç* oder schärferes *s*) irrationell *z* (im Sinne der deutschen Aussprache = *ts*) gebraucht ist, so dass die Buchstaben *z* und *s* in der vulgärdeutschen und in der antiken (griechisch-römischen) Schreibweise der palaestinensischen Namen gerade den umgekehrten Wert haben, was bei der Vergleichung der verschiedenen Namensformen zu beachten ist. Da der am meisten von dem traditionell gebrauchten *s* abweichende Laut des *sch* (*שׁ*) in manchen Uebersetzungen (z. B. in der englisch-kirchlichen durch *sh*) unterschieden wird, erschien es uns zweckmässig ihn wenigstens durch einen Accent über dem *š* in den in Lapidarschrift gesetzten hebräischen Namen zu bezeichnen, während in den Namen aus anderen Sprachen das volle *sch* beibehalten ist.

Die Vocale haben durchaus ihren, der reinen deutschen Aussprache entsprechenden Wert; ihre Quantität ist nur in den Fällen einer möglichen Unsicherheit ausdrücklich bezeichnet: dass diess in den verschiedenen Schriftarten durch verschiedene Zeichen (Querstrich und Circumflex) bewirkt ist, hat seinen Grund nur in typographischer Convenienz. Der von der Quantität unabhängige Wortaccent ist in denjenigen modernen Namen gesetzt worden, die man häufig oder gewöhnlich mit unrichtiger Accentuirung ausgesprochen hört.

## NACHTRÄGE.

Zu Doliche Syr. setze den heutigen Namen: *rud. Tell-Duluk j. Aintâb.*

Zu Oasis major ist als heutiger Name statt *Uah ed-Dakhl* richtiger *Uah el-Kharge* zu setzen.

### Berichtigung zu Karte T. IV.

Die Lage von Synnada in Phrygien, welche noch auf den zuletzt gedruckten Karten T. IV falsch angegeben ist, kann jetzt nach der Auffindung einer Inschrift zu *Tschifut kassaba*, wie schon im Index richtig bezeichnet, nach Choisy (mitgetheilt in der *Révue archéologique* 1876) berichtigt werden; es ist danach genau  $\frac{1}{2}$  Breitengrad (3 D. M. 15 röm. M.) südlich von der in der Karte angegebenen Stelle anzusetzen.
