# CONTENTS

---

	Preface . . . . .	19
<b>1.</b>	<b>Preparation for operation. Patient information.</b> . . . . .	<b>21</b>
1.1.	Indications for surgery . . . . .	21
1.1.1.	Absolute indications for operation . . . . .	21
1.1.2.	Relative indications for operation. . . . .	22
1.2.	Operative risk . . . . .	23
1.2.1.	Age . . . . .	24
1.2.2.	General health . . . . .	24
1.2.3.	Disease that provides indication for the operation and the extent of surgery . . . . .	26
1.2.4.	Repeat surgery . . . . .	26
1.2.5.	Anaesthetic risks. . . . .	26
1.2.6.	Personality and psychological state . . . . .	27
1.2.7.	The choice of surgeon. . . . .	27
1.2.8.	Estimating operative risk . . . . .	27
1.3.	Patient information . . . . .	28
1.4.	Informed consent . . . . .	29
1.5.	Preoperative preparation . . . . .	29
1.5.1.	General guidelines . . . . .	29
1.5.2.	Special requirements before specific operations . . . . .	30
1.5.2.1.	Preparation before operations on the vulva . . . . .	30
1.5.2.2.	Preparation before operations for urinary incontinence. . . . .	31
1.5.2.3.	Preparation before surgery for uterovaginal prolapse . . . . .	32
1.5.2.4.	Preparation for vaginal hysterectomy . . . . .	32
1.5.2.5.	Preparation for laparoscopy . . . . .	33
1.5.2.6.	Preparation for 'conservative' gynaecological laparotomies . . . . .	33
1.5.2.7.	Preparation for abdominal hysterectomy . . . . .	33
1.5.2.7.1.	Preparation for extended abdominal hysterectomy. . . . .	34
1.5.2.8.	Preparation for Caesarean section . . . . .	34
1.6.	Prophylactic measures before obstetric and gynaecological operations . . . . .	35
1.6.1.	Preventive measures before Caesarean section . . . . .	35
1.6.2.	Prophylactic measures in cases of intrauterine death . . . . .	36
1.6.3.	Perioperative preventive measures at fertility restoration procedures . . . . .	36
1.6.4.	Prevention of thromboembolic complications. . . . .	37
1.6.4.1.	Estimating the risk of thrombosis . . . . .	37
1.6.4.2.	Postoperative thrombosis prevention. . . . .	38
1.6.4.3.	Additional pharmacological methods . . . . .	38

1.6.5.	Prophylactic measures in relation to the gastrointestinal tract . . . . .	40
1.6.6.	Drainage. . . . .	42
1.6.6.1.	Drainage of the operative field . . . . .	42
1.6.6.2.	Drainage of the abdominal wound. . . . .	43
1.6.6.3.	Bladder drainage . . . . .	43
1.6.6.3.1.	Episodic catheterisation . . . . .	43
1.6.6.3.2.	Permanent (transurethral and suprapubic) catheterisation . . . . .	44
1.6.7.	Wound dressing, bandages . . . . .	48
	<i>References</i> . . . . .	48
<b>2.</b>	<b>Postoperative surveillance, postoperative care</b> . . . . .	<b>51</b>
2.1.	Postoperative care after uncomplicated simple procedures . . . . .	51
2.2.	Postoperative fluid and electrolyte balance . . . . .	52
2.2.1.	Physiological principles . . . . .	52
2.2.2.	Principles of postoperative fluid therapy . . . . .	53
2.2.3.	Replacement of large fluid (blood) volumes. Coagulation . . . . .	55
2.2.4.	Postoperative infusion therapy in practice . . . . .	55
2.3.	The most common postoperative complications . . . . .	58
2.3.1.	Decreased urine output . . . . .	58
2.3.2.	Fluid and electrolyte imbalance. . . . .	59
2.3.2.1.	Fluid deficit. . . . .	59
2.3.2.2.	Fluid overload. Hydration . . . . .	60
2.3.2.3.	Hyperkalaemia. . . . .	61
2.3.2.4.	Hypokalaemia . . . . .	62
2.3.2.5.	Hypercalcaemia . . . . .	63
2.3.2.6.	Hypocalcaemia . . . . .	65
2.3.2.7.	Hypermagnesaemia. . . . .	66
2.3.2.8.	Hypomagnesaemia . . . . .	66
2.3.2.9.	Abnormal zinc levels. . . . .	66
2.4.	Shock. . . . .	67
2.5.	Postoperative infections . . . . .	70
2.5.1.	Urinary tract infections . . . . .	70
2.5.2.	Operative site infections . . . . .	70
2.6.	Postoperative ileus . . . . .	70
2.6.1.	Mechanical ileus . . . . .	71
2.6.2.	Paralytic ileus (ileus paralyticus) . . . . .	72
2.7.	Pressure sores. Decubitus. . . . .	73
	<i>References</i> . . . . .	74
<b>3.</b>	<b>Instruments, suture materials</b> . . . . .	<b>75</b>
3.1.	Hand instruments . . . . .	75
3.1.1.	Dissecting forceps. . . . .	76
3.1.2.	Needleholders . . . . .	78
3.1.3.	Artery forceps, tissue clamps. . . . .	78
3.1.4.	Aneurysm needle, ligature carrier . . . . .	80
3.1.5.	Uterine dressing forceps, polyp forceps, ovum forceps. . . . .	80
3.1.6.	Volsellum, tenaculum forceps . . . . .	80
3.1.7.	Scissors. . . . .	85
3.2.	Abdominal wall retractors . . . . .	85
3.2.1.	Hand held abdominal wound retractors . . . . .	88
3.2.2.	Self-retaining abdominal wound-retractors . . . . .	88
3.3.	Wound-retracting hooks and other instruments . . . . .	92

3.4.	Vaginal wall retractors . . . . .	92
3.5.	Suture materials . . . . .	95
3.5.1.	Physical properties of suture materials . . . . .	95
3.5.2.	Biological properties of suture materials . . . . .	96
3.5.3.	Strength of suture materials . . . . .	97
3.5.4.	Absorbable suture materials . . . . .	98
3.5.4.1.	Catgut . . . . .	98
3.5.4.2.	Synthetic absorbable suture materials. Polyglycolic acid, polyglactin 910 and polydioxanon . . . . .	98
3.5.5.	Non-absorbable suture materials . . . . .	99
3.5.5.1.	Metal sutures . . . . .	99
3.5.5.2.	Silk . . . . .	99
3.5.5.3.	Linen . . . . .	99
3.5.5.4.	Polyamide sutures . . . . .	100
3.5.5.5.	Polyaesther sutures . . . . .	100
3.5.5.6.	Polypropylene sutures . . . . .	100
3.6.	Needles . . . . .	100
3.7.	Tissue adhesives, surgical glues . . . . .	102
3.8.	Tying knots . . . . .	103
3.8.1.	Types of knots . . . . .	104
3.8.2.	Steps of tying knots . . . . .	106
3.8.3.	Tying knots with instruments . . . . .	109
3.9.	Continuous sutures . . . . .	111
3.9.1.	Over-running continuous suture . . . . .	113
3.9.2.	Continuous interlocked suture . . . . .	113
3.9.3.	Continuous mattress suture . . . . .	113
	<i>References</i> . . . . .	114
<b>4.</b>	<b>Techniques of opening the abdomen. Abdominal wound closure.</b> . . .	<b>115</b>
4.1.	Techniques of opening the abdomen . . . . .	119
4.1.1.	Longitudinal incision . . . . .	119
4.1.1.1.	Low midline incision. Laparotomia medialis inferior . . . . .	119
4.1.1.2.	Lower paramedian laparotomy. Laparotomia paramedialis inferior . . .	119
4.1.1.3.	Pararectal laparotomy. Laparotomia pararectalis . . . . .	121
4.1.2.	Transverse incision . . . . .	121
4.1.2.1.	Pfannenstiel-incision. Laparotomia sec. Pfannenstiel . . . . .	121
4.1.2.2.	Cherney's incision. Laparotomia sec. Cherney . . . . .	121
4.1.2.3.	Mini laparotomy. Laparotomia suprapubica minima . . . . .	122
4.1.2.4.	Maylard's incision. Transverse muscle-cutting incision. Laparotomia transmuscularis transversa sec. Maylard . . . . .	122
4.1.3.	McBurney's grid incision. Laparotomia sec. McBurney . . . . .	123
4.1.4.	McBurney's lateral grid incision. Laparotomia lateralis sec. McBurney . . . . .	123
4.1.5.	Advantages and disadvantages of different abdominal incisions . . . . .	123
4.2.	Abdominal wound closure. general guidelines . . . . .	124
4.2.1.	Closing the parietal peritoneum . . . . .	125
4.2.2.	Approximation of the rectus muscles . . . . .	126
4.2.3.	Closure of the sheath . . . . .	126
4.2.4.	Mass closure . . . . .	127
4.2.5.	Skin closure . . . . .	128
4.3.	Prevention and treatment of wound disruption . . . . .	134
	<i>References</i> . . . . .	135

<b>5.</b>	<b>Abortion</b> . . . . .	136
5.1.	Spontaneous abortion . . . . .	136
5.1.1.	Aetiology of spontaneous abortions . . . . .	137
5.1.1.1.	Maternal causes . . . . .	137
5.1.1.2.	Paternal causes . . . . .	138
5.1.2.	Clinical classification of abortions . . . . .	138
5.1.2.1.	Threatening abortion . . . . .	138
5.1.2.2.	Inevitable abortion . . . . .	138
5.1.2.3.	Incomplete abortion . . . . .	139
5.1.2.4.	Complete abortion . . . . .	139
5.1.2.5.	Missed abortion . . . . .	139
5.1.2.6.	Recurrent miscarriage . . . . .	139
5.1.2.7.	Septic abortion. . . . .	139
5.2.	Artificial abortion. Termination of pregnancy . . . . .	140
5.2.1.	First trimester termination of pregnancy . . . . .	141
5.2.1.1.	Dilatation + curettage (D + C). . . . .	141
5.2.1.2.	Cervix dilatation + vacuum aspiration (D + VA) . . . . .	147
5.2.1.3.	Menstrual regulation . . . . .	149
5.2.1.4.	The use of antiprogestone . . . . .	150
5.2.2.	Termination of pregnancy in the second trimester . . . . .	151
5.2.2.1.	Extraovular instillation . . . . .	152
5.2.2.2.	Intraovular instillation . . . . .	152
5.2.2.3.	Prostaglandins and antiprogestins. . . . .	152
5.2.2.4.	Surgical methods . . . . .	154
5.2.3.	Selective abortion, selective feticide. . . . .	155
5.2.4.	Complications of termination of pregnancy . . . . .	158
5.2.4.1.	Early complications. . . . .	158
5.2.4.2.	Late sequelae of abortions . . . . .	160
5.2.4.3.	Explanation of late sequelae of abortions . . . . .	162
	<i>References</i> . . . . .	164
<b>6.</b>	<b>Pathological pregnancy</b> . . . . .	166
6.1.	Cervical pregnancy . . . . .	166
6.2.	Tubal ectopic pregnancy . . . . .	170
6.3.	Ovarian pregnancy . . . . .	174
6.4.	Abdominal pregnancy . . . . .	175
6.5.	Trophoblastic tumours . . . . .	178
6.5.1.	Hydatid mole. . . . .	180
6.5.2.	Invasive mole . . . . .	182
6.5.3.	Choriocarcinoma . . . . .	182
	<i>References</i> . . . . .	185
<b>7.</b>	<b>Surgical methods of increasing the capacity of the birthcanal</b> . . . . .	187
7.1.	Bloodless methods of increasing the capacity of the birthcanal . . . . .	187
7.1.1.	Artificial rupture of the membranes . . . . .	187
7.1.2.	Dilatation of the cervix . . . . .	188
7.1.3.	Vaginal dilatation using retractors or forceps . . . . .	191
7.2.	Incisional methods of dilatation of the birthcanal . . . . .	192
7.2.1.	Episiotomy . . . . .	192
7.2.2.	Incision of the cervix. . . . .	196
7.2.3.	Anterior vaginal hysterotomy . . . . .	196
	<i>References</i> . . . . .	203

<b>8.</b>	<b>Injuries of the birthcanal</b> . . . . .	204
8.1.	Birth injuries of the vulva and perineum . . . . .	204
8.1.1.	Injuries of the vulva . . . . .	204
8.1.2.	Injuries of the perineum. . . . .	205
8.2.	Birth injuries of the vagina . . . . .	208
8.3.	Vulval and vaginal haematomas . . . . .	209
8.4.	Cervical tears. . . . .	211
8.5.	Uterine rupture . . . . .	212
8.6.	Injuries of the bony pelvis . . . . .	215
8.6.1.	Symphysiolysis . . . . .	216
8.6.2.	Fracture of the coccyges . . . . .	216
8.7.	Fistulae. . . . .	217
8.7.1.	Vesicovaginal fistula . . . . .	217
8.7.2.	Rectovaginal fistula . . . . .	217
	<i>References</i> . . . . .	218
<b>9.</b>	<b>Third stage complications</b> . . . . .	219
9.1.	Mechanism of placental separation . . . . .	219
9.2.	Signs of placental separation. . . . .	221
9.3.	Management of normal third stage. . . . .	221
9.3.1.	Conservative management of the third stage . . . . .	221
9.3.2.	Active management of the third stage. . . . .	222
9.4.	Examination of the placenta and the membranes . . . . .	223
9.5.	Management of pathological third stage . . . . .	223
9.5.1.	Retained placenta . . . . .	224
9.5.1.1.	Placenta incarcerata . . . . .	224
9.5.1.2.	Placenta non soluta. . . . .	224
9.5.2.	Removal of retained placental fragments . . . . .	227
9.5.3.	Removal of retained membranes and clots . . . . .	228
9.6.	Bleeding after the third stage . . . . .	229
9.7.	Uterine inversion. <i>inversio uteri</i> . . . . .	231
	<i>References</i> . . . . .	234
<b>10.</b>	<b>Operative vaginal delivery in cephalic presentation</b> . . . . .	235
10.1.	Forceps delivery . . . . .	235
10.1.1.	Conditions of forceps delivery. . . . .	235
10.1.2.	Indications for forceps delivery . . . . .	238
10.1.3.	Types of forceps . . . . .	239
10.1.4.	General rules of forceps delivery . . . . .	242
10.1.5.	The technique of forceps delivery . . . . .	246
10.1.6.	Forceps delivery with vertex presentation . . . . .	250
10.1.6.1.	The use of Wrigley's forceps at caesarean section . . . . .	251
10.1.7.	Forceps delivery for abnormal rotation of the head . . . . .	251
10.1.7.1.	Forceps delivery in deep transverse arrest . . . . .	251
10.1.7.2.	Forceps delivery for occipito-posterior position. . . . .	252
10.1.8.	Forceps delivery for abnormal attitude . . . . .	255
10.1.8.1.	First degree deflexion . . . . .	255
10.1.8.2.	Brow presentation. . . . .	257
10.1.8.3.	Face presentation . . . . .	258
10.1.9.	Forceps delivery of the aftercoming head . . . . .	260
10.1.10.	Risks of forceps delivery . . . . .	260
10.2.	Vacuum extraction . . . . .	260

10.2.1.	Conditions for vacuum extraction . . . . .	261
10.2.2.	Indications for vacuum extraction . . . . .	262
10.2.3.	Technique of vacuum extraction . . . . .	262
10.2.4.	Risks of vacuum extraction . . . . .	263
10.2.5.	Liberal use of vacuum extraction . . . . .	265
10.2.6.	Comparison of the results of vacuum extractions and forceps deliveries . . . . .	265
10.2.7.	Comparison of vacuum extractions using metal and silicone rubber cup . . . . .	265
10.3.	Shute's parallel forceps . . . . .	267
10.3.1.	Comparison of vacuum extractions and forceps deliveries using Shute's instrument. . . . .	267
10.4.	Willet's scalp forceps . . . . .	269
	<i>References</i> . . . . .	269
<b>11.</b>	<b>Breech presentation</b> . . . . .	270
11.1.	Classification of breech presentation. . . . .	270
11.2.	Risks of breech delivery. . . . .	271
11.3.	Management of vaginal breech delivery . . . . .	272
11.3.1.	Management of vaginal breech delivery by the Bracht–Covjanov method. . . . .	273
11.3.2.	Management of vaginal breech delivery according to the Burns–Marshall method . . . . .	274
11.3.3.	Delivery of the arms by Müller's manoeuvre . . . . .	275
11.3.4.	Shoulder and arm extraction according to Lövset . . . . .	275
