
MONOSACCHARIDE SUGARS

Chemical Synthesis by
Chain Elongation,
Degradation,
and Epimerization

ABBREVIATIONS AND ACRONYMS xvii

Introduction I

I Ascending Synthesis of Monosaccharides 3

1.1. Buildup with Total Synthesis 3
 1.1.1. *The Formose Reaction* 3
 1.1.2. *Synthesis from Glyceraldehyde* 15
 References to Sections 1.1.1 and 1.1.2 17
1.2. Buildup of Sugars with Ascending Synthesis 18
 1.2.1. *The Cyanohydrin Synthesis*
 (Kiliani-Fischer Synthesis) 18
 References to Section 1.2.1 28
 1.2.2. *Synthesis of Acid Derivatives by Means of*
 Nucleophilic Substitution 30
 References to Section 1.2.2 40

- 1.2.3. Nitroalkane Syntheses 40
- 1.2.3.1. Chain Extension with Nitromethane 42
 - 1.2.3.2. Chain Extension with Nitroethane 50
 - 1.2.3.3. Chain Extension with Nitroethanol 52
 - 1.2.3.4. Chain Extension with Nitroalkane Carboxylic Acids 53
 - 1.2.3.5. Nitroaldol Condensation of Monosaccharides Containing Nitromethyl Groups 56
 - 1.2.3.6. Nitroaldol Condensations with 1-Deoxy-1-Nitroaldoses 64
 - 1.2.3.7. Nitroaldol Condensation with C-Glycopyranosyl-Nitromethane Derivatives 67
References to Section 1.2.3 69
- 1.2.4. Chain Extension with Diazoalkanes 72
- 1.2.4.1. Hydrolysis of Diazoketones 72
 - 1.2.4.2. Addition of Diazomethane to aldehydo-Sugars 75
References to Section 1.2.4 80
- 1.2.5. Chain Extension with Malonester Derivatives 81
- 1.2.5.1. Condensation of Open-Chain Monosaccharides with Active Methylene Compounds (Knoevenagel-Doebner Reaction) 82
 - 1.2.5.2. Chain Extension with Malonate Derivatives 90
References to Section 1.2.5 99
- 1.2.6. Chain Extension with Phosphoranes: Olefination Reactions for Synthesis of Chain-Extended Monosaccharides 100
- 1.2.6.1. Chain Extension with Nonstabilized Ylides 101
 - 1.2.6.2. Extension of the Saccharide Chain with (Oxoalkylidene) Phosphoranes 128
 - 1.2.6.3. Elongation of the Sugar Chain with Alkoxy-carbonylmethylene-phosphoranes 140
 - 1.2.6.4. Chain Extension of Saccharides with Phosphoryl-Stabilized Carbanions 159
References to Section 1.2.6 177
- 1.2.7. Miscellaneous Methods for Extension of the Monosaccharide Chain 188
- 1.2.7.1. Chain Extension by Addition of Organometallic Compounds to an Aldehyde or Lactol Function of Saccharides 188

- 1.2.7.1.1. *Extension of the Sugar Chain by the Addition of Grignard Reagents to aldehydo-Sugars* 188
- 1.2.7.1.2. *Extension of the Sugar Chain by Addition of Lithioorganic Compounds to aldehydo—Sugar Derivatives* 199
- 1.2.7.1.3. *Chain Extension of Saccharides with Organosilicon, Organotin and Organo-boron Compounds* 215
- 1.2.7.2. *Chain Extension of aldehydo-Sugars with Thiazole, Furan, and Pyrrole Derivatives* 234
- 1.2.7.3. *The Reformatsky Reaction for the Chain Extension of Saccharides* 245
- 1.2.7.4. *Preparation of Sugar Derivatives by Means of Chain Extension Based on Aldol-Condensation* 252
- 1.2.7.5. *Chain Extension of Unsaturated Sugars to Nonbranched Derivatives* 274
 - 1.2.7.5.1. *Chain Extension of Glycals and Hydroxyglycals with Alkenes* 274
 - 1.2.7.5.2. *Chain Extension by Hydroformylation of Glycals (Oxo Reaction)* 277
 - 1.2.7.5.3. *Ascending Syntheses by Claisen Rearrangement of Glycals* 283
- 1.2.7.6. *Ascending Synthesis with aldehydo-Saccharides* 286
- 1.2.7.7. *Chain Extension of Aldonic Acids and Aldonolactones* 297
- 1.2.7.8. *Anhydroaldononitriles: The C-1 Chain-Extended Products of Cyclic Aldose Derivatives* 316
- 1.2.7.9. *Chain Extension of Saccharides Starting with Acetylene Derivatives* 331
- 1.2.7.10. *Chain-extension of Halogenide Compounds* 334
- 1.2.7.11. *Ascending Syntheses with Sulfonic Acid Esters* 347
- 1.2.7.12. *Ascending Syntheses with Nitrogen-Containing Saccharides* 352
- References to Section 1.2.7* 360

2 Descending Syntheses of Monosaccharides 375

- 2.1. Disulfone Degradation 375
 - References to Section 2.1 389
- 2.2. Degradation of Calcium Salts of Aldonic Acids with Hydrogen Peroxide 389
 - References to Section 2.2 392
- 2.3. Descending Syntheses of Acylated Aldonitriles 393
 - References to Section 2.3 401
- 2.4. Degradation of Saccharides with Oxidative Methods 401
 - 2.4.1. *Degradation by Cleavage with Periodates* 402
 - References to Section 2.4.1 417
 - 2.4.2. *Degradation by Means of Cleavage with Lead Tetraacetate* 418
 - References to Section 2.4.2 424
 - 2.4.3. *Descending Syntheses of Onic Acid and Uronic Acid Derivatives* 425
 - 2.4.3.1. *Descending Syntheses of Onic and Uronic Azides* 425
 - 2.4.3.2. *Degradation of Onic and Uronic Amides with Hypochlorite* 430
 - 2.4.3.3. *Descending Synthesis by Decarboxylation of Mercuric and Silver Salts of Uronic Acids* 433
 - 2.4.3.4. *Decarboxylation of Uronic Acids with Lead Tetraacetate* 436
 - 2.4.3.5. *Electrochemical Oxidation of Uronic Acids* 441
 - 2.4.3.6. *Degradation of Ascorbic Acid Derivatives* 442
 - References to Section 2.4.3 448
 - 2.4.4. *Oxidative Degradation of Aldoses to Aldonic Acids with Chain Shortening* 450
 - References to Section 2.4.4 456
 - 2.4.5. *Degradation of Peroxide Derivatives of Saccharides* 457
 - 2.4.5.1. *Descending Synthesis of Sugar-Derived 1-Phenylazohydroperoxides* 457
 - 2.4.5.2. *Degradation of Saccharides by Fragmentation of Acylated Peroxyglycosides* 458
 - References to Section 2.4.5 463
 - 2.4.6. *Chain Shortening of Saccharides by Means of Photochemical Methods* 463

- 2.4.6.1. *Light-Induced Degradation
of Saccharides* 463
- 2.4.6.2. *Metal-Ion-Catalyzed Photochemical
Descending Syntheses of Aldoses* 466
- References to Section 2.4.6* 469

3 Preparation of Sugars with Isomerization 471

- 3.1. Epimerization of Saccharides in Alkaline Media 471
References to Section 3.1 477
- 3.2. Epimerization of Sugars with Molybdate Ions 478
References to Section 3.2 482
- 3.3. Epimerization of Saccharides with Amine Complexes of
Transition and Alkaline Earth Metals 483
References to Section 3.3 491

Notes Added in Proof 493
