

CHAPTERS FROM GEOLOGY

for

Geographers, Geography teachers and Biologists

Edited by

ZOLTÁN PÜSPÖKI

University of Debrecen
2004

CONTENTS

1. INTRODUCTION (TO GEOLOGY?)	7
1.1 CLASSICAL GEOLOGICAL BRANCHES	7
1.2 APPLIED GEOLOGICAL SUB-DISCIPLINES.....	8
1.3 THE ROCK CYCLE AND ITS CONSEQUENCES	9
2. IGNEOUS ROCKS (PÉTER RÓZSA)	12
2.1 THE NATURE OF MAGMA	12
2.2 OCCURRENCE OF IGNEOUS ROCKS	13
2.2.1 <i>Types of intrusions</i>	13
2.2.2 <i>Types of extrusions</i>	15
2.3 STRUCTURE AND CRYSTALLISATION OF ROCK-FORMING SILICATE MINERALS	17
2.4 PRINCIPAL TEXTURES OF IGNEOUS ROCKS	22
2.4.1 <i>Principal textures of volcanic rocks</i>	23
2.4.2 <i>Principal textures of hypabyssal and plutonic rocks</i>	23
2.5 CLASSIFICATION OF IGNEOUS ROCKS.....	24
2.6 CLASSIFICATION OF VOLCANICLASTIC ROCKS	28
2.7 SHORT DESCRIPTION OF THE MAIN IGNEOUS ROCK TYPES.....	29
2.7.1 <i>Plutonic rocks (figure 12)</i>	29
2.7.2 <i>Volcanic rocks</i>	30
3. PLATE TECTONICS (RICHARD WILLIAM McINTOSH)	32
3.1 THE CONCEPT OF PLATE TECTONICS	32
3.2 DIVERGING MARGINS: RIFTS, MID OCEANIC RIDGES AND OCEANIC BASINS	34
3.2.1 <i>Formation of the rift systems</i>	34
3.2.2 <i>Magmatic processes</i>	34
3.2.3 <i>Structural and global tectonic consequences</i>	36
3.3 CONVERGING MARGINS: SUBDUCTION OF THE OCEANIC CRUST; ISLAND ARC SYSTEMS	37
3.3.1 <i>Development of the converging margins</i>	37
3.3.2 <i>Magmatic processes</i>	38
3.3.3 <i>Forearc Region</i>	39
3.3.4 <i>Island arc</i>	39
3.3.5 <i>Back-arc Region</i>	40
3.4 COLLISION, OROGENE REGIONS	40
3.4.1 <i>Development of orogene regions</i>	40
3.4.2 <i>Magmatic and metamorphic processes</i>	41
3.5 TRANSLATIONAL PLATES	42
3.6 EVOLUTION TRENDS OF THE LITHOSPHERE	42
4 SEDIMENTARY ROCKS (ZOLTÁN PÜSPÖKI)	45
4.1 ORIGIN, CLASSIFICATION AND GENERAL DESCRIPTION OF SEDIMENTARY ROCKS	45
4.1.1 <i>Formation of sediments and sedimentary rocks</i>	45
4.1.2 <i>Classification and general characteristics of sedimentary rocks</i>	46
4.1.3 <i>The main sedimentary environments (sedimentary basins)</i>	46

4.1.4 Bedding.....	47
4.2 DESCRIPTIVE CHARACTERISTICS OF SILICICLASTIC ROCKS	49
4.2.1 Determination and interpretation of grain size distribution.....	49
4.2.2 Analysis and interpretation of grain morphology.....	55
4.2.3 Mineralogical composition of siliciclastic sediments	57
4.3 WEATHERING OF SILICATE STRUCTURES	58
4.3.1 The concept of weathering.....	58
4.3.2 Way and control of the alteration of silicate structures.....	60
4.3.3 Place and products of weathering	61
4.4 CARBONATE ROCKS AND CARBONATE DEPOSITIONAL ENVIRONMENTS	64
4.4.1 Chemical and textural components of carbonate rocks.....	64
4.4.2 Classification of carbonate rocks	65
4.4.3 The main environments of carbonate deposition.....	67
4.5 ORGANIC MATERIALS COAL AND HYDROCARBON DEPOSITS	71
4.5.1 Classification and lithology of coals	71
4.5.2 Palaeoenvironmental conditions of the coal deposits.....	72
4.5.3 Formation and migration of hydrocarbons	73
4.6 EVAPORITES	75
5 METAMORPHIC ROCKS (ZOLTÁN PÜSPÖKI).....	77
5.1 PROCESS AND CLASSIFICATION OF METAMORPHISM	77
5.2 THERMAL METAMORPHISM	78
5.2.1 Terminology of the thermal metamorphism.....	78
5.2.2 Processes and mineral associations in the thermal metamorphism	78
5.3 DYNAMOTHERMAL METAMORPHISM.....	79
5.3.1 Classification and processes of the dynamothermal metamorphism – mineral facies.....	79
5.3.2 Stages of the dynamothermal metamorphism	80
5.4 THE UPPER BOUNDARY OF THE METAMORPHISM - ULTRAMETAMORPHISM.....	83
